To begin the alignment of quality measure reporting under the Hospital IQR and Medicare EHR Incentive Programs, CMS is offering hospitals two options to meet FY 2016 IQR reporting requirements for the VTE, Stroke, ED and PC measure sets. These four sets are included in both programs. Under the Hospital IQR Program for the **FY 2016 payment determination**, hospitals may choose to either (1) electronically report at least one quarter of CY 2014 quality measure data for up to 16 of the measures, or (2) continue reporting all of these measures using chart-abstracted data for all four quarters of CY 2014.

For **FY 2017 payment determination** hospitals that elect to voluntarily submit electronic measures to meet the Hospital IQR program requirements must submit one quarter of electronic clinical quality measure data from Q1, Q2, or Q3 of CY 2015. Hospitals must use the 2014 version of the measure specifications and submit 16 measures covering three NQS domains from the 28 available electronically specified measures.

For **FY 2018 payment determination** hospitals will be required to submit at least 4 electronic clinical quality measures from the 28 available electronic inpatient clinical quality measures to meet the requirements of the Hospital IQR Program. Hospitals must submit, electronically, Q3 or Q4 2016 data for 4 measures of their choice. Meeting this requirement for the HIQRP will also meet the EHR Incentive Program's Meaningful Use requirement for eCQM reporting.
